many metal songs incorporate poetry into their lyrics using a broad array of techniques both textual and musical this book develops a novel adaptation appropriation and quotation taxonomy that both expands our knowledge of how poetry is used in metal music and is useful for scholars across adaptation studies broadly the text follows both a quantitative and a qualitative approach it identifies 384 metal songs by 224 bands with intertextual ties to 146 poems written by fifty one different poets with a special focus on edgar allan poe john milton s paradise lost and the work of wwi s war poets this analysis of transformational mechanisms allows poetry to find an afterlife in the form of metal songs and sheds light on both the adaptation and appropriation process and on the semantic shifts occasioned by the recontextualisation of the poems into the metal music culture some musicians reuse and sometimes amplify old verses related to politics and religion in our present times others engage in criticism or simple contradiction in some cases the bands turn the abstract feelings evoked by the poems into concrete personal experiences the most adventurous recraft the original verses by changing the point of view of either the poetic voice or the addressed actors altering the vocaliser of the narrative or the gender of the protagonists these mechanisms help metal musicians make the poems their own and adjust them to their artistic needs so that the resulting product is consistent with the expectations of the metal music culture

this magnificent collection of essays by scientist and national book award winning writer lewis thomas remains startlingly

relevant for today's world luminous witty and provocative the essays address such topics as the attic of the brain falsity and failure altruism and the effects the federal government's virtual abandonment of support for basic scientific research will have on medicine and science profoundly and powerfully thomas questions the folly of nuclear weaponry showing that the brainpower and money spent on this endeavor are needed much more urgently for the basic science we have abandoned and that even medicine's most advanced procedures would be useless or insufficient in the face of the smallest nuclear detonation and in the title essay he addresses himself with terrifying poignancy to the question of what it is like to be young in the nuclear age if wordsworth had gone to medical school he might have produced something very like the essays of lewis thomas time no one better exemplifies what modern medicine can be than lewis thomas the new york times book review
